Year : 2005

Desc. : A kind of alternative of Yin-Yan. This paper gives an "invaluable" pace to the drawing, as well as a sober aspect. This character is one of my first... it was the precursor of a long series. Came then the monsters, the heads with copies and well of others. Its position is very posed, as a character-logo - it is desired. As for the writings, do not seek the direction of them!

Desc. : You will have included/understood it, it is a drawing inspired of pixel-art. I found interesting to make pixel without data-processing support, because I do not like the absolute perfection: the right angles, that leaves me cold! - except in certain artists, such as for example for the kings of pixel-art: Yassin & Devos. A reference!

In fact, all the drawings having this kind of excavated details can give this impression: ridges the experiment! This drawing is singular in my gallery: for once I let speak the beauty about the feature

"Expression tardive"

Size (HxW) : 14x12 cm

Style : Cubism / Tech. : mixed

Theme : Character / People / Category : Drawing

Price : Euros 23

Year : 2005

Desc. : Here the late expression of a certain mixture. Feature and geometry with the pifometer... for a character a little monster and a little man. I am unaware of why I adore this catch, it will be necessary that I launch out in a whole series in this style. For me, the external structures all are simple but very harmonious. They define the position of the character, as if one did not know which of both elements had come the first. To the moment of the drawing, I confess it: it is well the character who initially came on the white sheet.

Style : Cubism / Tech. : mixed

Theme : Character / People / Category : Drawing

Price : Euros 28

Year : 2005

Desc. : When I see Mr M, I have the impression to see a self-portrait. However, one cannot really say that it resembles to me physically... a notation symbolic, perhaps? Possible. Marriages of the red and the black: I adore, of small with the large size. One asks me sometimes why Mr M is called thus. With that, I can answer large thing... I found simply this name sympathetic, nothing more. Perhaps could one smell there a small influence "the fellows and the injuries" (but yes! Mr Heureux, Mr Etonnant, Mr

Syndicaliste, etc...). These histoirettes rocked my early childhood, perhaps me remains it something about it.

Size (HxW) : 15x10 cm

Style : Cubism / Tech. : mixed

Theme : Allegories / Category : Drawing

Price : Euros 200

Year : 2005

Desc. : Large like a postcard, Althère-Natives is a drawing which me A took an insane time...! 300 squares in black on white and 300 others in white on black... each one patiently traced, colored, mijoté. I am conscious that it is compared well little with thousands of vaster and excavated works, moreover this drawing is never considering. I am nevertheless very proud... whom want? The scanner is far from all restoring well, but I show Althère-Natives with whom wants freest of the world: -) At the beginning, I intended to comply with rule 1 puts = 1 head of face, then the drawing has to even evolve/move of him. Large plans came, of the heads of profiles, the whole body, of the details of the body... finally, wink with this sign of Yin-Yan which is so expensive to me: a white box and a black box.

Style : Cubism / Tech. : mixed

Theme : Allegories / Category : Drawing

Price : Euros 32

Year : 2005

Desc. : The idea of this character is to represent a slim movement. The same hair symbolizes the wind. I like the singular positions, from where such an elasticity. The streaked colouring is of sharp color, of the tone to which I hang much more than front.

"Gens de jour"

Size (HxW) : 22x11 cm

Style : Cubism / Tech. : mixed

Theme : Allegories / Category : Drawing

Price : Euros 30

Year : 2005

Desc. : With the format "wraps longiligne", I endeavoured to do something of "flashant". On the level of the colouring, I remain faithful to my technique in small rounds, to make a plentiful effect. Some see even a kind of relief there. The scandalmongers will say that is by flemme to color each square millimetre... But for me, it is a way of drawing aside me from data processing. I do not like much what is plain (though the section "Paint cheap zone" goes in the contrary direction), I find that an imperfection is much more one quality than a defect, especially when it is desired. The faces have between them differences in size, with the clean direction. I like that a principal face defines the whole of the others.

"Gens de nuit"

Size (HxW) : 10x21 cm

Style : Cubism / Tech. : mixed

Theme : Allegories / Category : Drawing

Price : Euros 30

Year : 2005

Desc. : Faces crossing more than for "People of day", without intermingling. Contours were made with the fine pen, then certain parts were passed by again with the felt... like for the eyes. The fill color approaches that of the forms, to undoubtedly make a drawing merrier than with the accustomed one. However, the expressions of the characters do not appear very serene... a mixture of kinds, perhaps? I also timidly start to mix the right angles with the round-offs.

Desc. : The men fall, the ground cries... Here the typical example of my drawings known as "of récup". Term not very developing if it is, but purely technical, nothing to see with the value of work. At the beginning, this drawing is much larger. Dissatisfied of the unit, I all the same safeguarded these two characters accompanied by these small fellows.

Size (HxW) : 41x29 cm

Style : Cubism / Tech. : mixed

Theme : Allegories / Category : Drawing

Price : Euros 90

Year : 2005

Desc. : This drawing was carried out with calligraphic pen-ink: it is what made it possible to bind easily the fine features to the least fine. The bottom is not very present but the faces are for inonder the landscape.

"Têtes chercheuses"

Size (HxW) : 29x41 cm

Style : Cubism / Tech. : mixed

Theme : Allegories / Category : Drawing

Price : Euros 50

Year : 2005

Desc. : Still a drawing which has neither place nor towards! The black is present to characterize each character. The red emphasizes the face, as for the features between the heads and the necks, it is to emphasize the whole. Features which unfortunately pass badly to the numerical apparatus: about the middle, it is as if they did not exist. - to appreciate the reality of this drawing, thus pass to see me... - I did not seek to make them determined expressions, however one often sees my faces with frightened mines.

Style : Cubism / Tech. : mixed

Theme : Allegories / Category : Drawing

Price : Euros 130

Year : 2005

Desc. : Certain people see in first the white faces... for others, they are the black faces. These heads posed the ones on the others inspired the title of this drawing to me. In this colouring I launched out in new contrasts. Certain black zones are clearer, one can in particular distinguish a band from cleared up contrasts, passing from a column to another. A part of the white faces was colored with ink... to still dig contrasts. It is touching up! But unfortunately, it is not visible on the photograph...

"Z - Christalisation"

Size (HxW) : 38x28 cm

Style : Cubism / Tech. : mixed

Theme : Allegories / Category : Drawing

Price : Euros 55

Year : 2005

Desc. : A christic figure while going to the extreme in symbolism. Still, no religious message! I mingle with it with large simple features with more complex abstract structures. I adore this kind of mixture: the mixed techniques are for me the cream of the contemporary art. However, that remains wise compared to those which use joinings or volume! Paper, inks and the felts remain my favorite weapons.

Style : Cubism / Tech. : mixed

Theme : Allegories / Category : Drawing

Price : Euros 45

Year : 2005

Desc. : I wanted a drawing dissociating other heads squared, in particular by the colors. I chose tone the very sharp but especially distant ones from the others. Some prefer when I remain in only one tone (as for Têtes cannibales) of others like this kind of fire of artifices.
